

UCCE Glenn County - Olive Fruit Fly Populations for Glenn and Tehama County

Trapping finished as of 11/22/2006, will start again in April of 2006.

*Please note the significant increases in trap catches which began towards the end of Sept. This coincides with the onset of cooler weather. Although olive fly trap catches have been low through the hot period and fruit infestation levels in area orchards are low the increased fly activity could result in fruit damage at the end of the season. If your fruit will not be picked for awhile a treatment to avoid getting stung late is advised.

*Corning Restop-treated since 9/15/2006

*Oviposition stings at all Corning locations as of 7/19/2006.
