9-14-07 Please note: When we started the trapping season two of the three sites in Tehama County were not treated. Since then the two untreated sites have begun treating so all of the sites in Tehama County are now treated. Two of the three sites in Glenn County are still untreated. There has been an increase in activity. We are now catching flies in half of our sites. I have heard reports of larger catches in other sites than what we have seen and have also heard reports of some fruit infestation, mostly in unsprayed locations. This emphasizes the importance of monitoring in your own location. This is certainly not the time to let down your guard as the weather cools.
