Codling moth DD are at 521 following the 8/9/12 third biofix .

We have not observed NOW egg laying yet on our egg traps in almond. We check twice a week and should see them soon.

The Dairyville Hartley orchard that we monitor for Walnut Husk Fly (WHF) was sprayed for WHF a third time on 8/13. Watch traps carefully to decide if additional applications are necessary.

Additional Pest management information is available at the UC IPM website including a day degree calculator. <http://www.ipm.ucdavis.edu>.
