November in the Garden:

November garden tasks:

- You can still sow seeds of wildflowers this month. Plant California poppy, calendula, clarkia, and sweet peas.
- In the veggie garden plant seeds for lettuce, mustard, spinach, radishes and peas.
- If you didn't get your new tree planted last month, it is not too late to take advantage of the fall root growth that will give your new tree a strong start in the spring.
- Look at your camellias and remove excess buds to get larger flowers.
- In the middle of the month fertilize the veggies and flowers that were planted in October.

Also, this is the time to plant the chilled bulbs, and the spring flowering tubers and corms. Clean up all the fallen/falling leaves and other plant debris and dispose of diseased materials.
