This is the first pest update for the 2015 season. Following tradition, our first update gives you a historical look at the first biofix for each insect. Biofixes indicate the date when these insects are consistently caught in traps.

Pest updates and orchard information can also be found at ceteama.ucdavis.edu click on orchard crops then click on insect updates. Integrated Pest Management (IPM) information is available at <http://www.ipm.ucdavis.edu>

Notice that biofixes are early compared to previous years. So get traps up and plan accordingly.
