Advice to Grow By ... Ask Us!

The UC Master Gardener Program designed the California Garden Web to serve as a portal to organize and extend the University of California's vast collection of research-based information about gardening to the **public**. The California Garden Web focuses on sustainable gardening practices and uses a question and answer format to present solutions. The blog below highlights gardening issues pertaining to the season.

New mobile app to track close encounters with coyotes

Added February 13, 2017

As urban coyote numbers rise, the animals are increasingly crossing paths with residents. There have been police reports of coyotes attacking pets and even people, but there has been no place to report casual coyote encounters. Now there is a new...
