SWALES

RAIN GARDENS

How does a rain garden work?

Gutters & Down Spouts

Assist with directing rain water from your roof to your rain garden.

Deep Roots

Plants with a deep root system encourage infiltration and help absorb nutrients.

Berm

A berm holds water in the garden during heavy rains.

Native Plants

Native plants are adapted to local conditions and are easy to maintain once established. Plus, they attract birds, butterflies and other pollinators.
