

Cover Crop Survey

To gain a better understanding of current barriers and motivators of cover cropping, UC Davis and UCCE researchers are conducting a California-wide almond growers' survey. This will bring valuable insight into region-specific needs as well as operational challenges. Results will be used to develop regional best management practices, as well as guide further research and extension activities.

Take the survey to tell us what you think and help guide cover crop research at: [Almond Cover Crop Survey](https://www.almondcovercrop.faculty.ucdavis.edu/)

Do cover crops help or hurt with . . .

Bees?

Weeds?

Soil health?

Take the survey to tell us what you think and help guide cover crop research!

Survey available online at the website below
or by scanning the QR code.
