

## Knotweed Control Project

### Survey Participation Form

Dear Resident,

We represent a multi-agency team comprised of various organizations, including the Marin Department of Agriculture, California State Parks, the University of California Cooperative Extension, The National Park Service, Marin Municipal Water District, One Tam, and the Marin Resource Conservation District. As a community service to protect our environment and meet our stream restoration goals, we are controlling Japanese Knotweed (*Fallopia japonica sp.*) along San Geronimo Creek and its tributaries. This service is offered free of charge and is grant and county funded. **There is no cost to the property owner for this work.** The Marin Knotweed Action Team (MKAT) and **project coordinator**, will **act as the primary contact** for questions or concerns related to knotweed in your community. Our desire is to work collaboratively with you to learn whether or not there is Japanese Knotweed present on your property. We would very much appreciate you completing this form, selecting Option #1 below, and returning it via mail, or email a scanned copy; this will enable us to begin to survey and treat this invasive weed this spring 2019. Alternatively, you may complete the form online at [ucanr.edu/marinknotweedparticipationsurvey](http://ucanr.edu/marinknotweedparticipationsurvey). Please read and select from the options below and send the form back as soon as possible (see back of page for return address).

If you have any questions please free to call us at 415-473-6070 or email us at [acdirkse@ucanr.edu](mailto:acdirkse@ucanr.edu) or [svswain@ucanr.edu](mailto:svswain@ucanr.edu).

**Property address(es):** \_\_\_\_\_

**Landowner name(s):** \_\_\_\_\_

**Landowner mailing address:** \_\_\_\_\_

**Tenant Names (if Applicable):** \_\_\_\_\_

**Phone number(s):** \_\_\_\_\_

**Email address(es):** \_\_\_\_\_

#### How would you like to participate?

- 1. I give permission to survey my property for Japanese Knotweed, and if found, would approve the use of herbicide(s) regulated for use along waterways by a licensed pest control business. There is no cost to the property owner for this work. I understand that manual removal techniques have been extensively attempted and have consistently failed. If no Japanese Knotweed is found, there will be no treatment.
- 2. I would like to learn more prior to giving permission to survey or treat. Please contact me to discuss this project at \_\_\_\_\_ (phone, email, etc)
- 3. I do not wish to participate, and understand that I will be contacted about abatement measures by the Marin County Department of Agriculture
