HE = Heirloom
OP = Open Pollinated
(D) = Determinate
VFNT = resistant to Verticillium and/or Fusarium wilt, Nematodes, Tobacco Etch Virus, and Tomato Spotted Wilt Disease

Feeder thanks to Bartack Engineering

TOMATO PLANT GROWTH FORM

DETERMINATE

A DETERMINATE TOMATO PLANT IS A SHORT BUSH WITH MOST FRUIT MATURING WITHIN ONE OR TWO 7 - 10 DAY PERIODS. IT DOES NOT REQUIRE SUPPORT, AND MAY BE PREFERRED FOR

INDETERMINATE

AN INDETERMINATE TOMATO PLANT CONTINUES TO GROW, REQUIRING SUPPORT. FRUIT MATURES CONTINUOUSLY UNTIL FROST OCCURS.

HEIRLOOM OR HYBRID

HEIRLOOM: A VARIETY, GENERALLY CONSIDERED PASSED DOWN FOR SEVERAL GENERATIONS, WITH STABLE CHARACTERISTICS. ALL HEIRLOOMS ARE OPEN-POLLINATED, BUT NOT ALL OPEN-POLLINATED VARIETIES ARE HEIRLOOMS. OPEN-POLLINATED PLANTS HAVE WIND OR BEES AS POLLINATORS. THEIR SEEDS BREED TRUE PRODUCING PLANTS SIMILAR TO THE PARENT.

HYBRID: A VARIETY CROSSBRED FOR A SPECIFIC PURPOSE, SUCH AS DISEASE RESISTANCE, FIRM FLESH OR THICK SKIN. ARTIFICIALLY POLLINATED, THEIR SEEDS DO NOT BREED TRUE (CHARACTERISTICS OF THE NEXT GENERATION USUALLY NOT THE SAME AS THE PARENT PLANT).
