Kern County 2021 Potato Variety Trial

There are three sub-trials in this project

Southwest Regional Trial

This trial continues the association that the California potato industry has had with Colorado State University and Texas A & M University in the formation of the Southwest Regional Trials. Advanced varieties are made available by CSU and TAMU each year for testing in regional trials. These varieties include russets, whites, reds, and specialty types. These varieties are replicated four times to minimize variations and to have an accurate measure of their true potential for yield, quality, and disease resistance.

The Kern County Potato Variety Selection Trial

The Kern County trial primarily consists of varieties developed by various university and the private breeders from North America. Selections in the trial are replicated four times. Varieties in this trial could be dropped after the first or second year, or go into a final third year of evaluation.

Observational Trial

Potato varieties with little history or data will be first looked at in the observational trial. It will consist of varieties from all breeders to test how they perform under Kern county conditions. Varieties that have proven merit in the observational trial will likely move up to the Kern County replicated trial the following year.

Planting and harvesting

Planted on 02/15/21

Harvested and graded on 06/14/21

In-house variety display 06-18-21

Southwest Regional Trial

10 Entries

Highest Yield

- CO13232-5W (chipper), 236 cwt

Standards

- Russet Norkotah, 81cwt
- Yukon Gold (Yellow), 105 cwt
- Atlantic (Chipper), 120 cwt

Trial Varieties

1. AC12080-4RU

2. AC12090-3RU

3. CO13003-1RU

Challenges this year

- Early heat wave
- Temperature fluctuations
- Southern blight and Soft rot.

Acknowledgements

Many talented and dedicated people assisted in these trials during the season. The variety evaluation team is thankful to Jed Dubose, Jennifer Fernberg and Cristal Hernandez for their hard work.

Without the commitment and collaboration from Kevin Johnston (Johnston Farms), the variety evaluation program would not be possible.

The team also owe profound thanks to Joe Nunez for his informative suggestions and sustained encouragement.

The team is indebted to David Holm, Maria Isabel Vales, Rob Wilson, Douglas Scheuring, and Jeffrey Koym for their guidance and collaboration on this trial.

Finally the variety evaluation team is thankful for funding from:

- California Potato Advisory Board
- USDA NIFA (Potato Breeding Research, award no: 2019-34141-30433)
- Potatoes USA
