Radish								•••••	•••••			
Rhubarb*												
Rutabaga		•••••							•••••	•••••		
Spinach		•••••	•••••							•••••	•••••	
Squash, Summer				•••••								
Tomatoes		▼										
Turnips		•••••							•••••	•••••		
Squash, Winter				•••••								

* Perennials - Do not harvest until spring of year two.

** Prefers coastal climate conditions. Not that easy to grow good quality in the San Joaquin Valley.

Be aware that late summer planted crops for fall harvest usually have more insect pest problems, such as aphids, whiteflies, worms, and squash bugs.
